DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Korhonen (6,829,726).

As to claim 1, Korhonen discloses an electronic device configured to be connected by a serial bus including a signal line and a shield line, comprising:

a signal receiving unit configured to receive signals from the shield line (Figure 1.16, column 5, lines 6-10); and

an identification unit connected to the signal receiving unit and configured to identify the received signals (column 5, lines 11-14),

wherein a self-test is performed based on results of the identification (column 5, lines 6-10).

As to claim 2, Korhonen discloses an electronic device as claimed in claim 1, wherein said signals from the shield line include one of direct-current voltage signals, tone signals, and digital signals (column 5, lines 18-21).

Art Unit: 2113

As to claim 3, Korhonen discloses an electronic device as claimed in claim 1, wherein the serial bus is a USB (Figure 1.16).

As to claim 4, Korhonen discloses an electronic device as claimed in claim 1, further comprising a display for displaying results of the self-test (column 3, lines 65-67).

As to claim 5, Korhonen discloses an electronic device configured to be connected by a serial bus including a signal line, comprising:

a signal receiving unit configured to receive signals off a standard for the serial bus from the signal line (Figure 1.16, column 5, lines 6-10); and

an identification unit connected to the signal receiving unit and configured to identify the received signals (column 5, lines 11-14),

wherein a self-test is performed based on results of the identification (column 5, lines 6-10).

As to claim 6, Korhonen discloses an electronic device as claimed in claim 5, wherein said signals off the standard for the serial bus include one of signals having voltages exceeding the standard for the serial bus (, signals different in transmission speed from the standard for the serial bus standard, and signals different in protocol from the standard for the serial bus standard (column 5, lines 48-51 & column 7, lines 6-8).

As to claim 7, Korhonen discloses an electronic device as claimed in claim 5, wherein the serial bus is a USB (Figure 1.16).

As to claim 8, Korhonen discloses an electronic device as claimed in claim 5, further comprising a display for displaying results of the self-test (column 3, lines 65-67).

Art Unit: 2113

As to claim 9, Korhonen discloses an testing device for transmitting test command signals to an electronic device connected with the testing device by a serial bus including a signal line and a shield line, said testing device transmitting the test command signals to the electronic device through the shield line (column 2, lines 47-53).

As to claim 10, Korhonen discloses an testing device for transmitting test command signals to an electronic device connected with the testing device by a serial bus including a signal line, said testing device transmitting signals off a standard of the serial bus as said test command signals to the electronic device through the signal line (column 2, lines 47-53 & column 4, lines 30-31 & lines 40-42).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Ehne whose telephone number is (571)-272-2471. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Beausoliel can be reached on (571)-272-3645. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
